PROFILE

Multimedia Engineering student at the Universitat de València, focused on Unity/C# game development and native Android applications with Kotlin. I combine software, visual design, prototyping, testing and creative automation.

SELECTED WORK

ADI | Native Android application

Final-year project

Designed and developed task and routine management for users with ADHD and autism.
Jetpack Compose, Room, adapted modes, visual sequences, calendar and tutor controls.
User testing and feedback informed navigation, voice controls and routine behavior.

Snail Mail Club | Game concept

Solo creative game concept centered on tactile letter-making and paper crafts.
Interaction design and production planning; Unity, C# and Blender are planned tools.

EXPERIENCE & EDUCATION

ANIEME / Furniture from Spain

Internship in digital content, B2B communication and process automation.

Multimedia Engineering | Universitat de València

Final degree project completed; defense pending.

TECHNICAL FOCUS

Development	Unity, C#, Kotlin, Android, Jetpack Compose, Python
Design & tools	Blender, interaction design, visual prototyping
Methods	User testing, QA fundamentals, automation, generative AI workflows
